

CLAMPCO *Clips October 2019*

Clampco has been working hard in 2019 to maintain the environmental standard ISO14001:2015, and all employees have been doing a great job recycling, following the used rag program, putting waste in correct barrels, etc.

In further preparation, for our surveillance audit coming on November 18th 2019, you will need to make sure that your area is clean, organized and all items are identified with a label.

There will be two auditors observing the production floor, checking for bottles, buckets, or plastic containers with any type of liquid in it to see if they are labeled properly. They will also observe the cleanliness of each work area.

As always, if you do not know the correct answer to a question, let the auditor know that you will find out and get back with him, or refer to getting a hold of your Supervisor. This is a way for an auditor to see if you have been trained properly. If you're worried about being chosen for an audit, here are some possible questions that the auditor may ask you:

- 1) How does Clampco alert you for a fire? (the fire alarm will go off)
- 2) Where do you go if there is a fire? (the NW corner of the parking lot and report to your lead/supervisor)
- 3) How are you alerted for a tornado drill? (all page speaker system)
- 4) Where do you go for a tornado? (restrooms that are labeled with tornado plaques)
- 5) What do you do in case of a spill? (notify Supervisor and get a spill kit to contain the spill)
- 6) Do you know where the spill kits are? (Pressroom, CNC Swiss Turn Area, Maintenance Area, and near end of the Yoder area)
- 7) What kinds of things do you do to help the environment at Clampco (Recycle cardboard, paper, batteries, aerosol cans, oil, coolants, scrap wire, and stainless steel)
- 8) Bottles and Cans are separated by our trash hauler at the transfer station in Wadsworth

The auditor will also ask if you know what our Environmental Policy is, and so everyone should have the card with the policy on it. You can show that person the card or point to the banners hung up around the plant if you get stuck.

I'm sure everyone will do fine, and don't forget to ask me if you have any questions. Thank you! – Fred Fagan, Quality Systems Manager

Who's Who at Clampco

Name: Mike Klancer, Quality Engineer

Normal Day Consists of: Working with every department to prevent and resolve quality issues so that we can meet our customers' requirements, especially those that make up our program business. I also work on PPAPs, First Article Inspections, and material certs to ensure that our clamps are approved for use by those customers. Other things I help with include receiving inspection, in-process and final inspections, performing various audits, and creating work instructions and forms as needed.

FAVORITE PART OF MY JOB: I enjoy working with so many different people and the variety of things I'm able to do here; no two days are ever the same. I really like being able to help people find answers to questions and come up with different ways to solve a problem.

Hobbies: Doing things with my family, especially playing with my three daughters, soccer, music and guitar, doing projects around the house, and playing all kinds of games.

A Note from the Desk of:

Shauna Dixon, Network Administrator

National Cybersecurity Awareness Month 2019

As businesses are increasingly moving to the cloud, cybersecurity measures have never been so important.

October is National Cybersecurity Awareness Month (NCSAM), and as such, we encourage Clampco employees, vendors, friends, and family to take proactive steps to enhance personal and collective cybersecurity. NCSAM is a collaborative effort between government and industry to raise awareness about the importance of cybersecurity and to ensure that all Americans have the resources they need to be safer and more secure online.

Every Clampco employee can help prevent malicious cyber-attacks by establishing effective cybersecurity practices, which include digital and non-digital methods. Cybersecurity is an essential factor to the success of any business or organization and we strongly encourage collaborative efforts across all sectors.

Throughout October, Clampco is committed to providing the necessary training and educational programs for all employees to further cybersecurity awareness within our organization. We will provide employees with the resources necessary to improve our cybersecurity and #BeCyberSmart while at work and home. Clampco's cybersecurity and information technology teams are at the leading edge of protecting our company and our customers' data. We are only able to be cyber secure because of our collective vigilance throughout all departments.

Clampco is proud to participate in these National level conversations around cybersecurity and will continue to champion the NCSAM message through its mainstream and social media.

Clampco is a National Cybersecurity Awareness Champion. Check us out. Thanks for staying proactive when it comes to cybersecurity at Clampco!
